

As strong as titanium: The Titan Kama 11.6 is one of our 3 superSUPs of the Titan series. The Titan series is forged of elements resulting in an ultra-strong SUP board. The Titan Kura 11.6 can handle heavy impact has one of the highest levels of buoyancy due to a durable soft EPS core wrapped in a monocoque fiberglass layup. Blended together with the world's strongest polycarbonate shell - created with vacuum molding - the Titan is engineered to handle heavy impact. A soft and grippy full EVA - deck pad offers even more protection, so you can nail your water sport goals season after season. These are the world strongest SUP-boards, to withstand all impacts.

Non slip EVA foam deck allows comfortable long term paddling
